

Quality Policy

Applied Power Engineering Ltd is a highly experienced solutions business within the power generation and renewable markets meeting the customer demands for quality products and services.

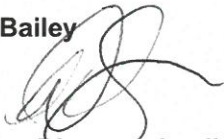

The company portfolio includes bespoke design and development, manufacture, supply through to commission of mains and generator control systems, mains protection, complex PLC control systems, gas and diesel generators. Fully managed HV or LV multi-generator and power plant installations, complimented with maintenance of power generation and switchgear equipment.

Working with premium manufacturers including ABB, ComAp, Cummins, Deep Sea, JCB, Koronka, Legrand, Metcraft, Motortech, Pramac, Schneider, Socomec, Weidmuller, to name a few, enables APE to provide the most up to date products for the application while providing national engineering and sales coverage throughout the UK.

We promote responsiveness, dependability and competence of all our employees, our commitment is to train and develop people to ensure we provide our customers with products and services that fulfil their expectations. As such, we will:

- develop and continually improve our Quality Management System based on ISO 9001:2015 including regular review of the Quality policy and respective Objectives;
- ensure that the customer and applicable statutory and regulatory requirements are determined, understood and consistently met;
- maintain focus on enhancing customer satisfaction;
- effectively address risks and facilitate opportunities affecting conformity of our products and services;
- raise awareness, educate and train people on quality matters, and provide appropriate resources to ensure that the Quality Policy is communicated and implemented in full;
- regularly review employees' skills and abilities to pursue an ongoing training policy ensuring the required competencies;
- regularly monitor our performance, conduct internal audits and reviews, and identify opportunities for continuous improvement to ensure that we are achieving our quality objectives and targets.

Darren Bailey

Communicating the quality policy

Top management ensures that the quality policy is communicated and understood by all employees. It is included in a new employee training and training on the Quality Management System. Top management regularly reviews the quality policy to determine the policy's continuing suitability with respect to purpose and context of the organization and the business direction.
